## Project Description
The Canton Public Library will undergo a construction project to remodel and make ADA compliant the lobby public restrooms, replace flooring in the lobby, main library area and Community Room, add study carrels and chairs in the southeast area of the library, and replace shelving for the Adult CD collection. The enhancement reflects our core values of Relevance, Access, Integrity and Leadership.

## Affected Space
21,280 square feet of the lobby, Community Room and adult library area

## Budget
The total budgeted cost of this project is $514,611 and will be paid for with a one-time fund balance transfer of $498,847 and operating fund and community donations of $15,764.

## Designer/Contractor
Library Design Associates, Plymouth, MI

## Timeline
Work will begin in early January and take about eight weeks to complete. At times, closure of certain areas of the library will be required, and staff assistance may be needed to retrieve materials from these locations.

## Major Features
This project continues the library’s three-year plan to replace worn furnishings, and maintain and update the facility so that we may continue to meet the community’s changing needs. The Community Room and areas of the main library will be re-carpeted to match the flooring of the 2014 renovation. The lobby area will be remodeled with new flooring and public restrooms will be updated and made ADA compliant. To keep up with user demand, additional individual study carrels will be installed and existing seating will be upgraded in the southeast corner. The shelving for the 14,150 heavily circulating adult music CDs will be replaced with a new sturdier design.

## Library Director
Eva Davis

## Library Trustees
Nancy Eggenberger, Michelle Farell, James G. Fausone, Sommer Foster, Thomas Hartnett, Don Turner
